Flow Guard Softener System

High Efficiency Conditioning
Saves Water, Soap
and Detergents
for Both City
and Well Water

Shown with Optional Cover

By WATER GUARD™
The Water Guard Softener System
Offers Benefits of Four Units in One!

Filters
Reduces sand, sediment and pipe scale which can accumulate in any municipal or well water system. The Water Guard Softener System is a perfect filter for reduction of this particle matter.

Softens
Reduces minerals containing calcium and magnesium which cause hard water. Hard water can have a bad taste and/or odor and makes laundry feel stiff. Excessive soap and detergents are necessary to overcome water hardness. With the Water Guard Softener System you’ll eliminate the problems associated with hard water and make clothes, skin and hair feel clean.

Clarifies
Underground water sources can contain very fine particles of clay and certain other minerals which can make water somewhat cloudy and odd tasting. Hard water can leave mineral spots and soap streaks on dishes and silverware. The Water Guard Softener System will greatly reduce/remove spots, color, taste and odor.

Removes/Reduces Iron
Some areas have ground water which is naturally high in iron. Evidence of this is red or yellow staining of plumbing fixtures, discolored laundry, and unpleasant odor and taste. The Water Guard Softener System effectively reduces such iron.
Engineered for Years of Trouble-Free Operation

Water Guard Softener System Valve Features:
- Built-in automatic bypass water flow maintained to your home during regeneration.
- Noryl® valve construction. Durable and noncorrosive, glass filled plastic valve.
- All components meet or exceed FDA, UL, and NSF compliance.
- Two hour battery backup. Maintains memory for up to two hours of power interruptions.

Meter Option:
- Auto regeneration based on usage.
- Hall-effect turbine.
- Reserve calculating for optimum efficiency.
- Override to day selections
- 63 day history report

Timer Option:
- Selectable program cycles to meet your needs.
- Set/Time clock regeneration.
- Programmable regeneration.
Nine good reasons why you need the Flow Guard Softener System

1. Better Tasting Food
2. Refreshing Drinking Water
3. Cleaner Dishes
4. Relaxing Baths and Showers
5. Soft Shining Hair
6. Plumbing Lasts Longer
7. Use Less Soap and Detergents
8. Longer Lasting Clothing and Fabrics
9. Lower Appliance Maintenance Costs
